

1. PRIVACY POLICY

- This privacy policy governs your use of the software application Site View Security (“Application or App”) for mobile devices that was created by James He.
- The Application is designed to work in conjunction with the Site View Security supported IP security cameras to allow live viewing and playback of recordings stored in the camera over P2P protocols
- The app also allows adjustments to camera settings to be made as well as the ability to show the camera's local and remote IP address, if available.

2. WHAT INFORMATION DOES THE APPLICATION OBTAIN AND HOW IS IT USED?

- The App obtains information from the camera related to its UID (unique ID hard coded into the camera firmware), password, and settings such as video resolution.
- It also details and lists any clips stored in the camera's SD card (if the user has inserted one), allowing the user to playback stored clips via the App.
- This information is obtained over proprietary and encrypted peer to peer protocols and hashed. The information obtained does not contain any personal details, only the technical information relayed by the user's camera that would be useful to that user within the app.

3. USER PROVIDED INFORMATION

- The only information provided the user is the camera's password and details of the user's WiFi network (SSID and password) to enable the camera to connect over the user's WiFi network. This information is used only within the camera and does not get stored on any external servers.

4. AUTOMATICALLY COLLECTED INFORMATION

- The App does not pull any information from the user's mobile device but does pull information from the security camera so that the user can be provided pertinent information within the App to be able to remotely control the camera and administrate settings adjustments and changes.
- In addition, the Application may collect certain information automatically, including, but not limited to, the type of mobile device you use, your mobile devices unique device ID, the IP address of your mobile device, your mobile operating system, the type of mobile Internet browsers you use, and information about the way you use the Application.
